KARIM ELKHOULY

Software Engineering Graduate | Junior Software Developer • IT Support
Kuwait | +965 98922336 | kareem.ramos22@gmail.com

PROFESSIONAL SUMMARY

Software Engineering graduate from Asia Pacific University (APU), Malaysia, with five months of IT internship experience at Hadi Hospital in Kuwait. Developed practical web and mobile solutions using JavaScript, Flutter, Node.js, Supabase and relational databases. Experienced in application troubleshooting, user-facing systems, REST APIs and database-backed workflows. Based in Kuwait; official degree certificate expected February 2027.

PROFESSIONAL EXPERIENCE

IT Intern — Hadi Hospital, Kuwait | **Sep 2025 – Jan 2026** IT Department

- Supported day-to-day technical operations, user assistance and troubleshooting in a working hospital IT environment.
- Contributed to a patient meal ordering system and assisted with hospital website functionality and usability improvements.

SELECTED PROJECTS

Pharmacy Website & Mobile Application Web development, Flutter, Dart, Supabase

- Developed a pharmacy web experience and companion mobile app with product browsing, authentication, shopping cart flows and backend integration.
- Live website: https://nabil-pharmacy.vercel.app/

Secure E-Commerce Platform — Final-Year Project HTML, CSS, JavaScript, Supabase/PostgreSQL

- Built shopping flows and administration features including authentication, product catalog, cart, checkout, order tracking and role-based access.

HR Management Mobile Application Flutter, Dart, Node.js, Express, MongoDB Atlas

- Built role-based employee and manager screens for attendance, leave, payroll, tasks and reporting; connected app screens to REST APIs.

Clinic Appointment Management System Java EE, GlassFish, SQL

- Implemented role-based scheduling, technician assignment, booking, receipts, feedback and reporting workflows.

TECHNICAL SKILLS

Languages JavaScript, Python, Java, C++, C#, Dart, SQL, R

Web & mobile HTML5, CSS3, Flutter; React (course/project exposure)

Backend & data Node.js, Express.js, Supabase, PostgreSQL, MySQL, MongoDB Atlas, REST APIs

Engineering tools GitHub, VS Code, UML/ERD, OOP, CRUD, testing, software design patterns

EDUCATION

BSc Software Engineering — Asia Pacific University (APU), Malaysia Degree requirements completed; official certificate expected February 2027

Relevant topics: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Software Architecture and Software Quality Engineering.

LEADERSHIP & LANGUAGES

President, Egyptian Community at APU | **2023–2024** Led cultural and academic events and coordinated with students from multiple universities.

Languages Arabic, English
